CAMERA HISTORY

Your webcam only shows now.
We add the history.

A browsable archive for every public webcam —
embedded in your site in minutes.

The problem

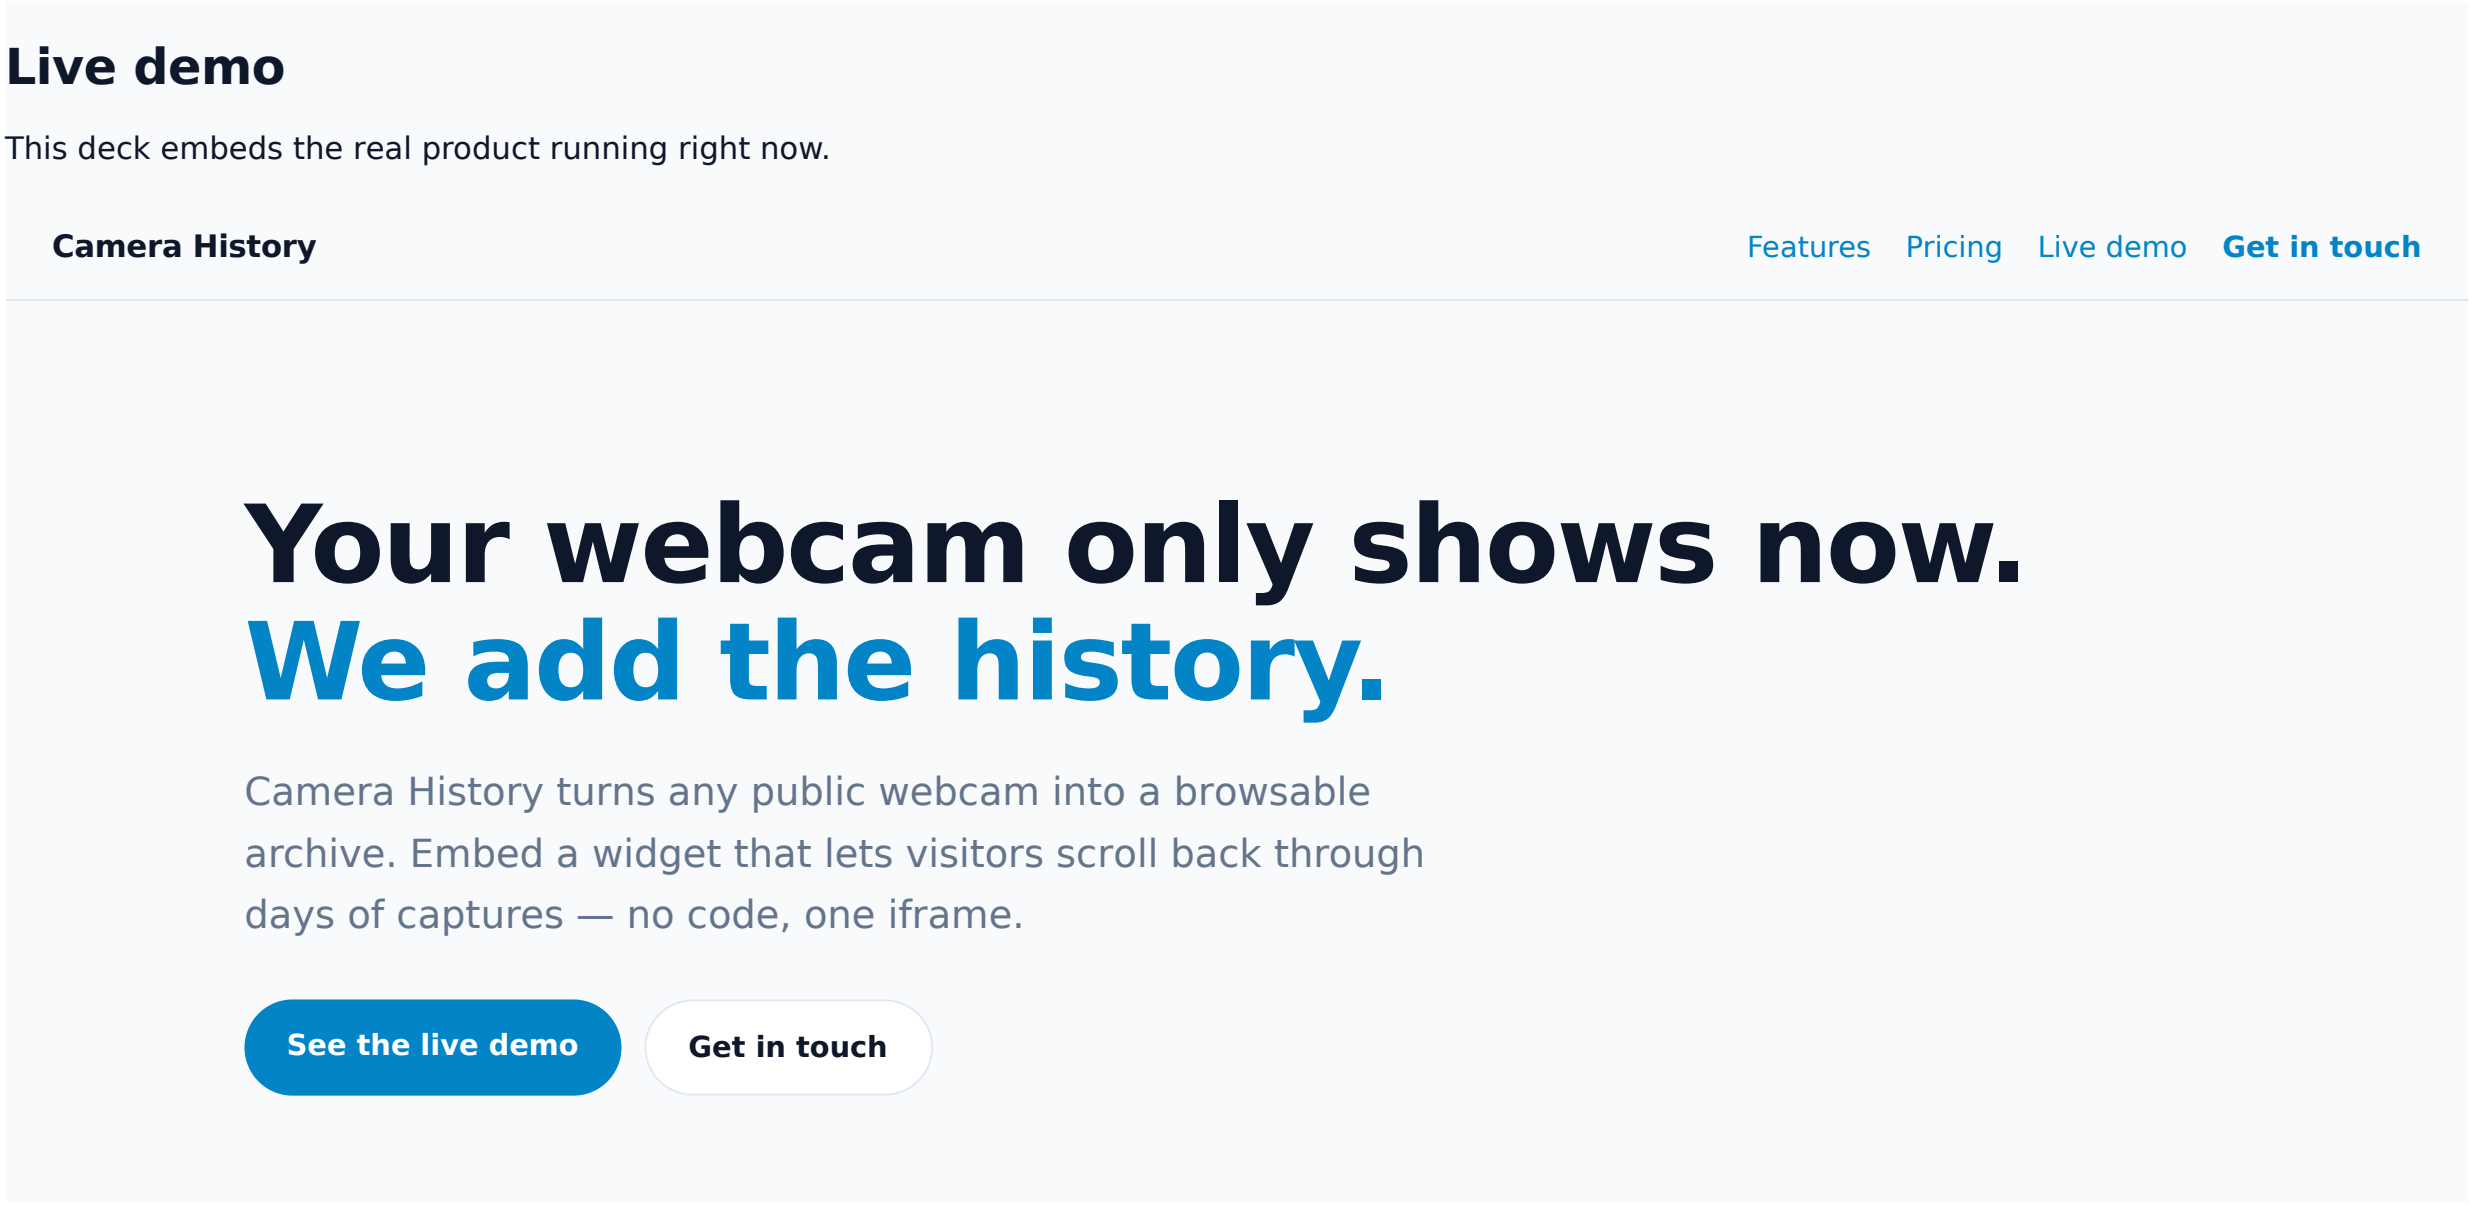

- A webcam shows one moment — then it is gone.
- Visitors who missed the powder day, the sunset or the storm never come back.
- Your live feed earns a glance, not a place in your visitors' plans.

The solution

- We capture your camera every few minutes and keep the archive for you.
- You embed one `<iframe>` — visitors browse history by day.
- Camera groups, four themes, shareable links and long retention included.

Live demo

This deck embeds the real product running right now.

How it works

1. Capture
Your camera is fetched every few minutes, around the clock.

→

2. Store
Captures are kept safe for up to 36 months.

→

3. Embed
Drop one iframe into your site. Done.

Features

Any feed type
JPEG, MJPEG, HLS, RTSP or custom WebSocket.

Retention up to 36 months
Pick the history your audience needs.

Shareable links
Every capture gets a permanent URL.

Four themes
Light, Dark, Forest, Midnight.

Camera groups
One widget, many angles, instant switching.

Mobile ready
Works on every screen, on every site.

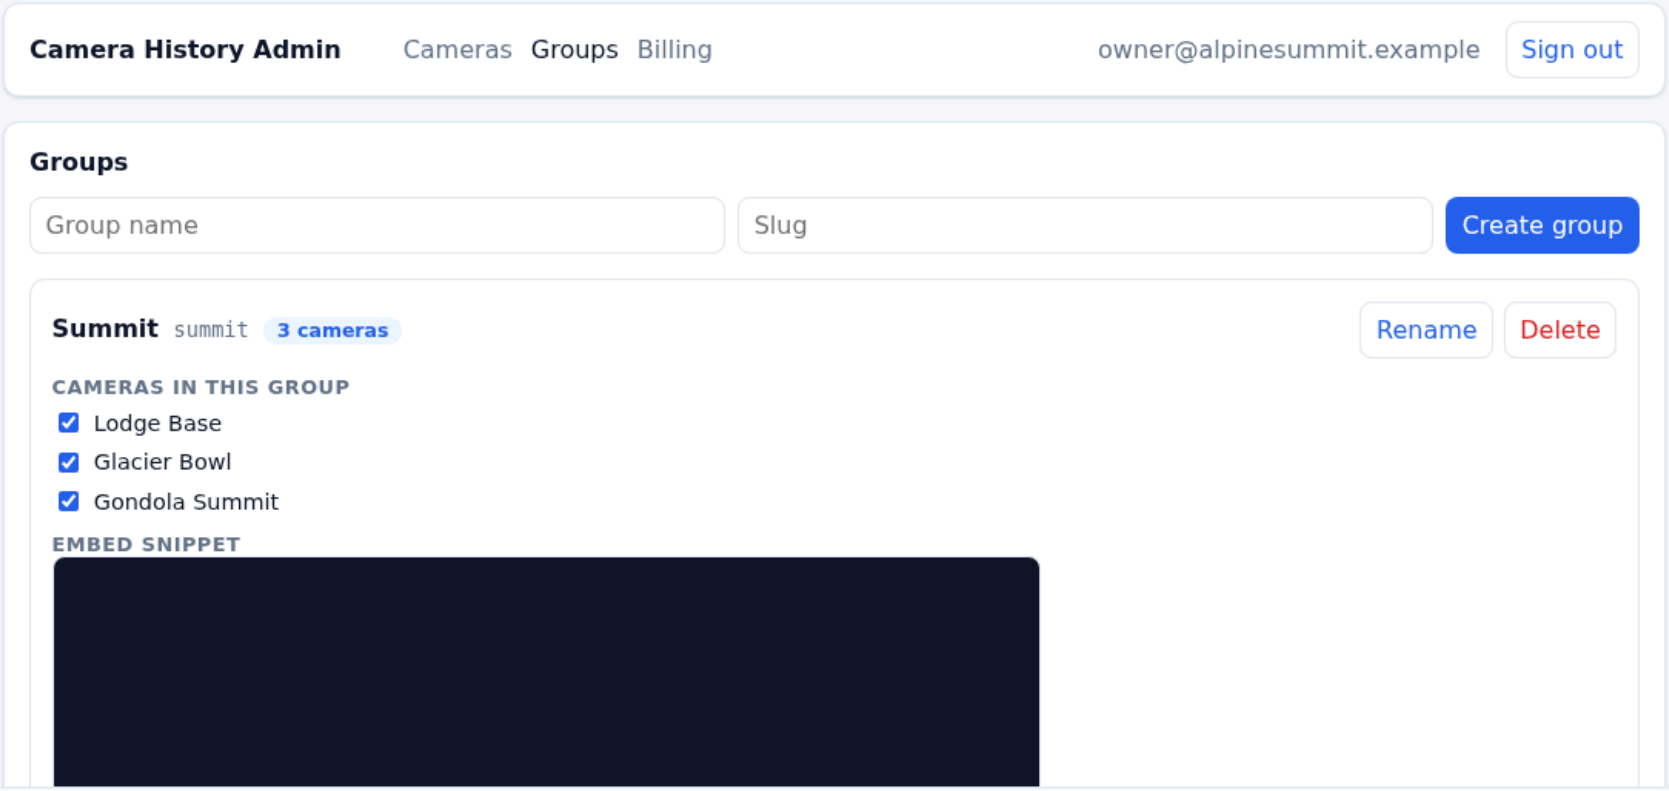

Admin dashboard

Self-service: add cameras, check status, grab your embed snippet.

Integrations

- **WordPress plugin** — install, paste your camera ID, done.
- **Any website** — one iframe snippet from your dashboard.
- **Camera groups** — embed a whole resort with a switcher.

Pricing

EUR per camera, VAT excl.

14 days	€5
1 month	€9
3 months	€15
6 months	€22
12 months	€29
24 months	€49
36 months	€69

Who it is for

- Ski resorts & mountain destinations
- Beaches, marinas & kite spots
- Tourist attractions & landmarks
- Construction & progress cameras
- Weather & nature streams

Why Camera History

- Self-service product — live today, not a prototype.
- Zero maintenance on your side — no servers, no ffmpeg.
- Your branding stays yours — the widget is neutral and fits in.

See your history, not just now
